

Testimonials

I love your Code-Rite machine. It is working like a charm!!

Blair, Drilling Supervisor

The ease with which field staff can code and approve work performed is great. It is accurate and efficient, and has made our records more current than we had ever envisioned.

Elaine, Field Cost Database Administrator

Code-Rite has made my job a lot simpler. It replaces many charts correlating companies and services and their respective numbers with a drop down list. It also makes sure the numbers are correct which is a bit of a headache when coding multiple tickets at the same time.

Brad, SAGD Completions

Code-Rite has helped me ensure that my costs are coded correctly and that the necessary invoices end up on my desk and at Accounts Payable in a timely manner. Prior to Code-Rite I spent considerable hours re-coding invoices and dealing with invoices that were months or years old without the necessary field approvals in place. Code-Rite has essentially put an end to that!

Craig, Drilling Logistics Coordinator

"I am impressed with the ease of month end coding for multi-well projects" Marcel, Drilling Consultant

"My time spent approving invoices has decreased by 70%." Troy, Drilling Superintendent

"Since invoices are being submitted with the correct information," we can rapidly and accurately process them. The invoices submitted with the Code-Rite label are correct 99% of the time, as opposed to their previous process where errors and deficiencies can occur in 4 out of 10 invoice submissions.

Kathy, Accounts Payable Supervisor

WORKS GOOD! ERIC, DIRT CONSULTANT

The Code-Rite system has made our invoice preparation faster, easier and more accurate and did not require any modifications to our current internal processes. It also ensured correct approval routing and facilitated prompt invoice payment. Several Service Companies
